

# NAVIGATIONAL ROUNDTABLE

## INDIVIDUAL COACHING COMBINED WITH PEER GROUP MEMBERSHIP

### THE VALUE OF BUSINESS COACHING

Our Business Coaching provides business leaders with confidential one on one discussions with a Certified Business Coach where they work together to identify critical objectives, develop plans of action, and maintain accountability to accelerate business success. This intensive customized focus provides the business owner the opportunity to make more money faster, acquire meaningful results through more effective teams, and benefit from a better work/life balance.

### PEER GROUP MEMBERSHIP BENEFITS

In “Think and Grow Rich” by Napoleon Hill, he clearly defines the power of Masterminds Groups. Peer groups provide a variety of benefits but most importantly they allow you to learn from the success and failures of others. You can choose to go it alone, but the path is much more difficult. Peer groups provide a sounding board for ideas, they work with you to understand how to manage growth or transition, and they offer access to resources and personal support. Additionally, they help you with your blind spots and respond with honest unbiased feedback. And, finally, they hold you accountable.
